Welcome!
We are pleased to invite you to GraphiCon’09 – the largest annual International conference on Computer Graphics and Vision in countries of the former Soviet Union.

What is GraphiCon
– Diverse audience: from young student minds to mature professionals.
– Applied scope: from biomedicine & industrial applications to game development.
– Efficient networking: ground to bridge scientists & business connected by the same researches.

Format
The following sections will be organized for the event:
– Young scientists school
– Master classes
– Key talks
– Paper presentations
– Poster sessions
– Industrial presentations
– Multimedia shows

Details: http://gc2009.graphicon.ru/cfp/

GraphiCon’2009
Exploring the scientific power of graphics

Conference Topics
The main topics of the conference include:

Graphics and multimedia
– Geometry modeling and processing
– Photorealistic rendering techniques
– Scientific visualization
– Image-based techniques
– Computer graphics for mobile devices
– Computer graphics hardware
– Graphics in computer games
– Animation and simulation
– Virtual and augmented reality

Image and video processing
– Image enhancement, restoration and super-resolution
– Segmentation and grouping
– Early vision and image representation
– Tracking and surveillance
– Medical image processing

Computer vision
– 3D reconstruction and acquisition
– Object localization and recognition
– Multi-sensor fusion and 3D registration
– Structure from motion and stereo
– Scene modeling
– Statistical methods and learning
– Biometrics

Applications

Participation
We are confident that GraphiCon’09 may bring everyone – an individual, a university or a company – something worthy and we encourage your participation in one of the following roles:
Visitor: Join us to enjoy tutorials, key talks, industrial presentations, multi-media shows, and invited talks by world-class speakers.
Speaker: Highlight your achievements in the described areas and gain expert feedback and idea sharing.
Sponsor: Benefit from our event and add new names to customer, partner and/or networking lists.

We sincerely hope for your participation in GraphiCon’09 and look forward to your registration.

Registration
We appreciate your time and kindly ask you to spend 5 minutes for online registration aimed to provide further purposeful updates:

Travel Directions
Access to the city of Moscow is easy and safe. There are a lot of daily direct non-stop flights from most countries.

Conference Topics
The main topics of the conference include:

Graphics and multimedia
– Geometry modeling and processing
– Photorealistic rendering techniques
– Scientific visualization
– Image-based techniques
– Computer graphics for mobile devices
– Computer graphics hardware
– Graphics in computer games
– Animation and simulation
– Virtual and augmented reality

Image and video processing
– Image enhancement, restoration and super-resolution
– Segmentation and grouping
– Early vision and image representation
– Tracking and surveillance
– Medical image processing

Computer vision
– 3D reconstruction and acquisition
– Object localization and recognition
– Multi-sensor fusion and 3D registration
– Structure from motion and stereo
– Scene modeling
– Statistical methods and learning
– Biometrics
